要旨：下顎骨骨髓炎の難治性疼痛に漢方薬を応用して治療にあたった。症例は63歳の男性。左側下顎大白歯部の持続的疼痛を主訴に当科を受診した。疼痛は難治であったが病態の変化や症状を考慮してできるだけ随証治療を行ったところツムラ黄連解毒湯と消炎鎮痛剤の投与で疼痛はほぼ緩解した。特に難治性疼痛の場合、積極的に随証療法を試みることによって治療成績は、より向上するものと考えられた。

索引用語：下顎骨骨髓炎、漢方薬、黄連解毒湯

PAIN AND KAMPO MEDICINE Vol.9 1999

An intractable pain of mandibular osteomyelitis treated with "Oren-gedoku-to" (huanglian jiedu tang)

**Abstract** : We report a case of intractable pain of mandibular osteomyelitis caused by tooth extraction. A 63-year-old male patient underwent an extraction of the first molar under the diagnosis of periodontitis. He visited the pain clinic of our hospital with the chief complaint of severe pain after exodontia. After a close examination, he was diagnosed as mandibular osteomyelitis. We treated him using Kampo medicine (mainly using Oren-gedoku-to) and NSAID. He showed an excellent improvement after our treatment.

We concluded that Kampo medicine with a comprehensive approach and observing patient's individual condition, is effective in the treatment of intractable pain of mandibular osteomyelitis.

**Key words** : Mandibular osteomyelitis, Kampo medicine, Oren-gedoku-to
