

症 例 報 告

前立腺癌放射線治療後の肛門部痛・陰茎痛に 漢方的治療が奏効した一症例

大木 浩*

要旨：肛門部痛は治療に難渋することが多い疼痛である。今回、前立腺癌放射線治療後に発症した肛門部痛、陰茎痛に対してオピオイド、神経ブロック療法の効果が十分でなく、乙字湯（TJ-3）、竜胆瀉肝湯（TJ-76）、ブシ末（TJ-3023）の併用が有効だった症例を経験したので報告する。

索引用語：肛門部痛，陰茎痛，瘀血，乙字湯，竜胆瀉肝湯，修治附子末

PAIN AND KAMPO MEDICINE Vol.20 (2010)

A combination of otsujito, ryutanshakanto, and heat processed bushi powder successfully treated a patient with anal and penile pain caused by radiotherapy.

Hiroshi Oki*

Abstract: A 73-year-old man had severe anal and penile pain caused by radiotherapy for prostatic cancer. A combination of otsujito (TJ-3), ryutanshakanto (TJ-76), and heat processed bushi powder (TJ-3023) successfully controlled the pain which was not reduced by the treatment with opioids and/or neural blockade.

Key words: anal pain, penile pain, oketsu, otsujito, ryutanshakanto, heat processed bushi powder
