心理社会的要因の関与する機能性腹痛に対する 漢方治療の役割

岡 孝和*

要旨:過敏性腸症候群と機能性腹痛症候群に対する漢方治療の役割に関して考察した.過敏性腸症候群に対する二重盲検ランダム化比較試験では、下痢型過敏性腸症候群の腹痛に対する桂枝加芍薬湯の有効性が示されている。一方、機能性腹痛症候群に対する漢方治療の有用性に関しては、いまだほとんど検討されていない、機能性消化管障害患者の腹痛に対する漢方薬治療の役割を確立するためには、さらなる検討が必要である.

索引用語:漢方治療、過敏性腸症候群、機能性腹痛症候群

PAIN AND KAMPO MEDICINE Vol.21 (2011)

Role of kampo medicine in treating patients with functional abdominal pain Takakazu Oka*

Abstract: This paper discussed the role of Kampo, a traditional Japanese herbal, medicine in treating patients with irritable bowel syndrome (IBS) and functional abdominal pain syndrome (FAPS). A double-blind, randomized clinical trial has demonstrated, and keishikashakuyakuto is effective for treating abdominal pain in patients with diarrhea predominant IBS. On the other hand, there is little evidence on the usefulness of kampo medicine for FAPS. Further study is necessary to establish the role of kampo medicines for treating abdominal pain in patients with functional gastrointestinal disorders.

Key words: kampo medicine, irritable bowel syndrome, functional abdominal pain syndrome
