症例報告

インフルエンザ予防接種後の神経障害性疼痛に対して 十味剉散加味方が奏効した一症例

平田道彦*

要旨:インフルエンザ予防接種後の神経障害性疼痛に対して十味判散加味方が奏効した. しびれを伴う痛みは接種直後から発症し、ビタミン剤とプレガバリンが投与されたが効果なく、約2ヵ月の経過の後漢方治療を開始した. 筋肉の萎縮を伴う疼痛に用いられる十味 判散加味方は極めて迅速にしびれと痛みを消退させた.

索引用語:インフルエンザ予防接種、神経障害性疼痛、十味判散

PAIN AND KAMPO MEDICINE Vol.22 (2012)

Effect of jumizasan added some crude drugs on neuropathic pain after the influenza vaccination

Michihiko Hirata*

Abstract: A case, 53-year-old man, of neuropathic pain that occurred after the influenza vaccination was reported. The dysesthesia and pain vanished by the administration of jumizasan added some crude drugs. Jumizasan is ordinary used for the pain with muscle atrophy in sacral neuralgia or cervical radiculopathy. It was suggested that jumizasan should be effective for some neuropathic pain with obvious neuron damage or not.

Key words: influenza vaccination, neuropathic pain, jumizasan
