視診で異常のない耳痛に対しての漢方治療

小路丸篤*

要旨:異常所見を認められない耳痛に対して漢方治療を行い良好な結果が得られた.使用した薬剤は、葛根湯と桂枝加朮附湯の合方で、12 例中 8 例に有効であった.この二剤の合方は葛根加朮附湯の方意を持っており、三叉神経痛に対して効果を発揮する薬剤である.今回の耳痛は、頸椎の異常が原因となる大後頭神経三叉神経症候群の一症状と考えられた.効果のなかった症例に対しては、駆瘀血剤や疏肝剤の併用も必要である.

索引用語:耳痛、葛根湯、桂枝加朮附湯、大後頭神経三叉神経症候群

PAIN AND KAMPO MEDICINE Vol.26 (2016)

Kampo therapy on otalgia without abnormal findings Atsushi KOUJIMARU*

Abstract: Kampo therapy was effective in otalgia without abnormal findings. Kakkonto and keishikajutsubuto were gave to twelve cases, and eight cases were effective. These two medicines are comprised of crude drugs similar to kakkonkajutsuto, and they are effective in trigeminal neuralgia. The otalgia in this case was thought to be one of the symptoms of the great occipital trigeminal syndrome. It is necessary to use kampo medicines improving blood stasis (oketsu) and depression (kiutsu) in the non-effective case.

Key words: otalgia, kakkonto, keishikajutsubuto, great occipital trigeminal syndrome
