症例報告

口腔インプラント周囲炎および神経障害性疼痛に 漢方治療が有効であった 1 症例

今泉うの*別部智司*吉田和市*

要旨:下顎左側臼歯部歯肉の痛みを主訴に来院した67歳の女性に対して,インプラント周囲炎および抜歯後神経障害性疼痛の診断の下,内服加療を行った. 当初プレガバリンのみ処方したが,痛みが残存したため立効散と排膿散及湯を併用したところ,歯肉の消炎と共に痛みが消失した. プレガバリンのみでは満足な効果が得られない口腔内の痛みに対して,立効散と排膿散及湯の合方を検討することは有用性が期待できると考えられた.

索引用語:立効散、排膿散及湯、インプラント周囲炎、神経障害性疼痛

PAIN AND KAMPO MEDICINE Vol.27 (2017)

Successful treatment with kampo medicines in a patient suffering from periimplantitis and neuropathic pain

Uno IMAIZUMI*, Satoshi BEPPU* and Kazu-ichi YOSHIDA*

Abstract: We report a case of peri-implantitis and neuropathic pain successfully treated with rikkosan and hainosankyuto. The patient is a 67-year-old woman. When she first came to our hospital, we prescribed pregabalin, but the pain did not reduce. We, therefore, prescribed rikkosan and hainosankyuto for her. Then the inflammation in gingiva disappeared, and her pain was removed. In a case of incurable oral pain with prescribing pregabalin alone, the mixture of rikkosan and hainosankyuto seems to be useful for pain management.

Key words: rikkosan, hainosankyuto, peri-implantitis, neuropathic pain
